PREPARATION NOTICE AND REQUIREMENTS FOR EXTERMINATION OF ROACHES

Please make sure all items are completed **before** your scheduled appointment.

1. Empty all cupboards and drawers in kitchen where food, dishes or pots and pans are stored. Any shelf paper should also be removed. Dishes may be placed on kitchen table if covered. Place any food such as butter or meat in refrigerator.
2. Have kitchen sink and stove area cleared and cleaned. Very important, roaches love food debris and grease.
3. Clean and wash all kitchen cupboards before service. **DO NOT** wash treated areas for 25 to 30 days because this will remove the pesticide. You can replace clean shelf paper or wipe with clean dry cloth before replacing glasses, dishes or food 3 to 4 hours after treatment.
4. Empty bathroom linen closet, cabinets and medicine chests of all personal items such as medicines, shavers and toothbrushes. Place in plastic bags and remove from bathroom.
5. For heavy infestation, remove all bedroom drawers from bureaus. Drawers may be placed on bed and covered with plastic or a sheet.
6. Fish tanks must be covered and their air pumps left disconnected for at least three (3) hours after treatment or until you are allowed to go back into the residence.

After treatment all people and pets must stay out of residence for a period of three (3) to four (4) hours. **DO NOT** go back in before 3 hours is up.

AFTER a treatment you will see more roach activity for about a week. This is because the fogging agent is forcing the roaches out of hiding. Roach activity should decrease after this period. We ask that you allow **THREE WEEKS** (3) for best results. Our pesticide stays active for 25 to 30 days. We recommend having a follow-up service done in approximately three (3) weeks.

Our pest control technicians have been instructed not to fog your home unless all preparation requirements have been completed.

THANK YOU FOR YOUR COOPERATION
